

L/S RECEIVES ISO 9001:2008 CERTIFICATION

The Quality Management System of L/S is compliant with all of the requirements set forth by ISO 9001:2008. This system is applicable to L/S's manufacturing of metal products, which include stamping, cutting, notching, welding, forming, and light assembly, as well as, the design and manufacture of related tooling and dies.

ONE HUNDRED CONSECUTIVE MONTHS OF SAFETY

Long-Stanton is proud to announce 100 consecutive months of safety. This achievement places L/S among the safest companies in the Precision Metalforming Association membership.

OUR GIFT TO CINCINNATI SHINES BRIGHTLY ON THE BERLIN WALL

The 12' high 4' wide 6,000 lb. section of the Berlin Wall was officially dedicated on July 3, 2010 at the Freedom Center in Cincinnati, Ohio. Long-Stanton is proud to have donated the time, people, and materials to design and manufacture this customized lighting cowl for the people of Cincinnati.

Marvin Cunningham, who headed up Long-Stanton's portion of the project, lines-up the specialized lighting units as they are being affixed to the lighting cowl, which L/S produced prior to being mounted on the Berlin Wall.

Marvin secures the cowl on the wall to ensure that the wall will be lit dramatically at night.

At the ceremonial dedication, L/S's gift of design and manufacturing of this specialized piece lights up the wall in dramatic fashion outside the Underground Railroad Freedom Center in Cincinnati, where it will be on permanent display.
